

**LC-MS/MS Confirmations/Determinations - Urine Continued**

**Other LC-MS/MS Tests**

Cyclobenzaprine	each	\$8.80
Diphenhydramine	each	\$8.80
Duloxetine (Cymbalta)	each	\$8.80
Gabapentin	each	\$8.80
Methylphenidate (Ritalin)	each	\$8.80
Naltrexone	each	\$8.80
Pregabalin	each	\$8.80
Sertraline (Zoloft)	each	\$8.80
Tapentadol	each	\$8.80
Trazadone (as mCPP)	each	\$8.80
Zolpidem (Ambien)	each	\$8.80

**Other LC-MS/MS Determinations**

D/L Methamphetamine	each	\$39.00
Designer Drugs (a-PVP, Butylone, Ethylone, MDPV, Mephedrone, Methyloine)	panel	\$25.00
GHB	each	\$34.00
Ketamine	each	\$11.55
Kratom (Mitragynine)	each	\$44.00
LSD	each	\$55.00
Nicotine/Cotinine	each	\$6.60
LC-MS/MS Determination not otherwise listed	each	\$8.80

**QTOF Analysis - Urine Qualitative (Positive/Negative) Results**

Comprehensive Panel (104 analytes)	\$45.50
Designer Stimulants Panel (20 Drug)	\$28.00
Synthetic Cannabinoids Panel (19 analogs)	\$25.00

**Oral Fluid Tests - LC-MS/MS only - Select analytes to customize a panel**

	<b>Base Price - Collection Tube</b>	each	\$4.00		
Amphetamine	each	\$6.60		<b>Illicit Drugs</b>	
Barbiturate	each	\$6.60		Methamphetamine - Included in Amphetamine panel	
Benzodiazepine	each	\$6.60		Cocaine	each \$6.60
Buprenorphine	each	\$6.60		Ecstasy	each \$6.60
Methadone	each	\$6.60		Phencyclidine	each \$6.60
Opiates	each	\$6.60		THC	each \$6.60
Oxycodone	each	\$6.60		<b>Other</b>	
<b>Synthetic Opiates</b>				Carisoprodol	each \$6.60
Fentanyl	each	\$6.60		Tapentadol	each \$6.60
Meperidine	each	\$6.60			
Propoxyphene	each	\$6.60			
Tramadol	each	\$6.60			

**Pharmacogenetic (PGx) Testing**

	<b>Quantity</b>	<b>Price</b>
Precision Medication Management - Psychiatric	each	\$300.00

*Up to 95% of drug variability between individuals is due to genetic factors. PGx testing can help shorten response time by limiting trial-and-error prescribing. In addition, metabolically inappropriate drugs and their side effects can be avoided, while drugs more likely to be effective are identified as clear, first-choice options.*

*\* For best results, provide all medications patient is taking or could be prescribed.*
