

II. Accessing Customer Support

The Motorola Solutions System Support Center Operations

Motorola Public Safety Applications Technical Support personnel in cooperation with Motorola System Support Center (“SSC”) provide the gateway to technical support for all of Motorola Public Safety Application systems. Accessing support through Motorola toll free 800 number, web ticketing or email ticketing ensures accurate case handling and tracking. The goal of the Support team and SSC is to make certain systems are restored and running at peak levels as quickly as possible. This is accomplished by obtaining accurate customer and problem details and by directing requests to the right support team in a timely manner.

The System Support Center offers total call management including:

- Single point of contact for Motorola service requests
- Logging, dispatching and tracking of service requests
- System capabilities to identify pending cases and automatically escalate to management
- Database and customer profile management
- Standard reports with on-demand distribution
- Case notification

Motorola System Support Center operates 24 hours a day, 7 days a week, 365 days a year. That means you can call us anytime. Support Center personnel enter requests for service, technical assistance, or telephone messages into a database system. Every time you call us, we log information about your request into the tracking system so that the information is available for reference and analysis to better serve your future service needs. Another benefit of logging every service request is that Motorola and customers can track the progress from initial contact to final resolution.
