#### Better Back Roads

- Lowndes County is not eligible for the 319(h)-grant funding for this project, but there is a source of “Healthy Watershed Initiative Funding” through Georgia EPD.
- This funding is appropriated to communities with stream segments listed as “supporting” their designated use (fishing, swimming, etc.). However, the funding may also be used for a project in which there is no current data showing any kind of impairment status.
- The Better Back Roads projects that can be proposed under this funding are to repair and manage dirt roads that have not yet been identified as having either a Biota M (Macroinvertebrate) or Biota F (Fish) impairment. These impairment categories simply differentiate the different communities that are impacted by sedimentation runoff in the streams.
