COUNTY ACTION REQUESTED ON: Emergency Repairs for the Public Safety Radio System due to lightning damage

HISTORY, FACTS AND ISSUES: Sometime during the July/August time frame we started getting reports of degraded radio functionality. Upon investigation by the radio shop, it was discovered that we had a damaged Tower Top Amp at the Valdosta Radio tower site. During the same time period, we started getting reports from public safety units of degraded radio coverage in the south end of the county (Lake Park and Echols County area). Upon further investigation, there was significant damage found at the Naylor Tower site. Aerial photos, that will be attached to the agenda item, show clear lightning damage.
