

Budgets for governmental fund types will be adopted on a basis of generally accepted accounting principles except for the recognition of outstanding encumbrances. Revenues are budgeted when they become measurable and available and expenditures are charged against the budget when they become measurable, a liability has been incurred, and the liability will be liquidated with current resources. All outstanding encumbrances are charged as an expenditure to the budget appropriation in the year initially encumbered.

### Revenues and Expenditures/Expenses

- Revenue resulting from exchange transactions, in which each party gives and receives essentially equal value, is recorded on an accrual basis when the exchange takes place. On the modified accrual basis, revenue is recognized in the year in which the resources are measurable and become available. Available means the resources will be collected within the current year or are expected to be collected soon enough thereafter to be used to pay liabilities of the current year. For the County, available means expected to be received within ninety days after year end. Revenues from grants exchange transactions will be recognized as measurable up to one hundred and fifty days after year end.

- Nonexchange transactions, in which the County receives value without directly giving equal value in return, include property taxes, sales taxes, grants, entitlements, and donations. On an accrual basis, revenue from property taxes is recognized in the year for which the taxes are levied. Revenue from sales taxes is recognized in the period in which the sales are made. Revenue from grants, entitlements, and donations is recognized in the year in which all eligibility requirements have been satisfied. Eligibility requirements include timing requirements, which specify the year when the resources are required to be used or the year when use is first permitted; matching requirements, in which the County must provide local resources to be used for a specified purpose; and expenditure requirements, in which the resources are provided to the County on a reimbursement basis. On the modified accrual basis, revenue from nonexchange transactions must also be available before it can be recognized.

- Under the modified accrual basis, the following revenue sources are considered both measurable and available at year end: sales taxes, charges for services, fines and forfeitures, grants, interest, and rent.
